

WHAT'S NEW IN THE 8E6 R3000

R3000 SOFTWARE VERSION 2.2.10

Marshal8e6 is pleased to announce the release of R3000 software version 2.2.10. This software release requires an R3000 or R3000IR appliance running software version 2.2.00 or later.

FREQUENTLY ASKED QUESTIONS

Q. Which types of objects are supported for Open Directory server types?

A. Using an Open Directory server, users, groups, and containers can be set up for authentication.

NEW FEATURES AT A GLANCE

- A new server type for Apple Open Directory has been added to the supported LDAP options.
- Links in System > Authentication > Enable/Disable Authentication window let you download the 8e6 Authenticator for your environment: Windows or Macintosh
- MSN's new bing.com search engine is now included among the Safe Search Enforcement options. The Safe Search Enforcement feature—enforcing the end user to perform a safe search when using any of the supported search engines—is enabled in the Filter Options tab of the Profile window.
- Enhancements have been made to Google Safe Search handling to accommodate changes Google recently made to the functionality of its search engine.
