

Security Reporter 3.3.20 Release Notes

December 2014

Trustwave is pleased to announce the release of Security Reporter version 3.3.20. This software release requires a Trustwave Security Reporter appliance (or virtualized instance) running software version 3.3.15 and will upgrade the Trustwave Security Reporter software version to 3.3.20.

This upgrade is compatible with a Web Filter appliance running software version 5.1.0 or later.

This upgrade does not provide reporting for Secure Web Gateway (SWG). You cannot upgrade to this version if SWG devices are present in the Device Registry. The latest version of SR that supports reporting for SWG is SR 3.4, which is also available as an upgrade from SR 3.3.15.

New Features

This release contains minor enhancements, security updates, and bug fixes. For more details, see the Resolved Issues section below.

Resolved Issues

- For a list of Resolved Known Issues, browse to <http://www.trustwave.com/software/8e6/ts/sr-rki.html>. Click the SR 3.3.20 accordion section to view the resolved known issues for this software release.

System Requirements

This software release is available for the following hardware platforms:

Models 300, 500, 505, 700, 705, 730, 735

Update Instructions

To update your supported Security Reporter appliance, see the Software Update section of the *Administrator Guide* or Software Update screen in the Console.

Note: If the SR is currently processing a significant volume of logs, it could take several hours for this software update to be installed.

Documentation
