What's New in the R3000 '2.0.07' Version

This newest release of software for the R3000 Enterprise Filter requires an R3000 unit running software version 2.0.05 or later.

NOTE: 8e6 recommends applying the 2.0.07 software at a time when a brief outage in filtering would be acceptable, as an approximate 5-minute outage in R3000 filtering services will occur when executing this upgrade.

Enhancements and Fixes

- Performance enhancements were made to the synchronization feature
- A modification was made in the authentication feature for handling Windows NT 4.0 group profiles
- The ability to assign filter options to container objects using the LDAP configuration has been fixed
